

This seminar introduces you to diagnostic tools within IMT: Integrative Diagnostics.

You will learn to recognize, when the body requires somatic body work and when the body requires release of emotional, mental / cognitive, spiritual and other energies. You will be able to localize, which tissues and structures in the body are affected by these energies. You will be able to discern where there are primary and related problems in the body.

This seminar introduces you to Applied Psychosynthesis and teaches you a way to release those energies with Neurofascial Process (NFP). Delta State Therapy – a hypnotherapist approach will be presented in this class, you will learn to understand inner child support and process. Neuropsychimmunology for healing, anatomic imagery for treatment of pain and disability and an introduction to Consciousness Rehabilitation for the healing support of your patient are presented in this class.

BODM 301 introduces you to tools of Integrative Diagnostics:

Myofascial Mapping on several planes, the ability to discover primary energies and physical dysfunction affecting your patient.

You will learn how to support Consciousness Rehabilitation in treatment and as a self-healing tool for your client using Neurofascial Process (NFP).

**Pre-Requisites:**

None
