

CRNS

Cranial and Nervous System

All of the material presented in this series is unique and developed by Dr. Sharon (Weiselfish) Giammatteo in the past 30 years. Diagnostic and treatment of functional impairment within the cranial system are „integrative“ for all professionals, all health care disciplines and all client populations.

The classes have to be taken in order.

CRNS 101

Cranial Series, Level One: Osseous, Suture, Joint and Membrane

This class presents palpation and assessment of the CRI (cranial rhythmic impulse/ cranio-sacral rhythm). Suture and joint restrictions and treatment of the cranial and facial vault, the temporo-mandibular joints, the spheno-basilar joint and the cranial and facial articulations are covered. Osseous dysfunctions and treatment as well as dura mater restrictions and treatment are addressed. The techniques provide solutions for headaches and migraines, spinal pain and disability, chronic pain and more.

Please review the anatomy, esp. Sphenoid, to be not unprepared.

Pre-Requisites:

None
