

**IMDE 101**

**Lymphatic System, Level One: Assessment, Integrative Diagnostics, and Integrative Manual Therapy for the Lymphatic System: Congestion Therapy**

This course presents techniques for decongestion of all lymphatic structures in order to improve the lymphatic pathway through the body. For the first time it is now possible to treat lymph-node congestion. The liver as a primary detoxification-organ for lymph is addressed by multiple techniques. Immune Deficiency Motility/Infection Motility (IDM/IM, aberrant motility, that indicates a lack of immune support) and Disruption of Membranes (DOM) will be taught in this class. Several techniques for skin-treatment are presented.

**Pre-Requisites:**
